

Calculating your Grade Point Average (GPA)

To calculate your GPA you will need to know the credit hours for the class. At Rose State, it is the fourth digit in the course number. See examples from a RSC schedule book.

EXAMPLES: ENGL 1113 - English Comp I is 3 credit hours, HSBC 2114 - Human Anatomy is 4 credit hours (REMEMBER, DO NOT INCLUDE NUTRITION OR DEVELOPMENTAL PSYCHOLOGY)

You will also need to know the grade you received in each class. Each grade is give a point value.

A=4, B=3, C=2, D=1, F=0. No point value is given for W, X, S, U, AU, AW, P, or I.

You will multiply the grade point value given by the credit hours for each class.

EXAMPLE:

Class	Grade	Point Value		Credit Hours		Total Grade Point Value
ENGL 1113 – English Comp I	A	4	X	3	=	12
HIST 1483 – US History to 1877	B	3	X	3	=	9
HSBC 1113 - Medical Terminology	A	4	X	3	=	12
BIOL 2114 - Human Anatomy	B	3	X	4	=	12
PSYC 1113 – Introduction to Psychology	A	4	X	3	=	12
CHEM 1114 – Introductory Chemistry	C	2	X	4	=	8
HSBC 1224 – Introduction to Microbiology	B	3	X	4	=	12
TOTALS			X	24	=	77

You must total the number of Credit Hours and the Grade Point Value. Above you will see the Credit Hours total 24 and the Grade Point Value total is 77.

You must divide the Grade Point value by the Credit Hours: $77/24 = 3.208$ 3.2 IS YOUR GPA

Class	Grade	Point Value		Credit Hours		Total Grade Point Value
English I			X	3	=	
English II			X	3	=	
US History			X	3	=	
Government			X	3	=	
Intro Psych.			X	3	=	
Med Term			X	3	=	
Anatomy			X	4	=	
Physiology			X	4	=	
Chemistry			X	4	=	
Microbiology			X	4	=	
			X		=	
Intro Nursing OR Transitions			X	1 OR 4	=	
			x	4	=	

_____ / _____ = _____ GPA

Total Grade Point Value divided by Total Credit Hours = GPA
